2.0.x → 2.1.0

<https://github.com/twitter/twitter-text/commit/ab02a1ad99e3462931a6b035c63693981a7385d7>

Top-level namespace changed from `Twitter` to `Twitter::TwitterText`. This resolves a namespace collision with the popular [twitter gem](https://github.com/sferik/twitter). This is considered a breaking change, so the version has been bumped to 2.1.
